OVERVIEW

Tubular Optimization Services provides independent connection supervision services paired with unsurpassed quality control procedures to protect the invested tubular interests of our customers.

Trained by both domestic and international tubular engineers, our staff possesses both the knowledge and experience to run over 30 different API, Premium, and Chrome connections worldwide. With over 30 years of tubular experience, exclusive proprietary thread compounds, and an industry leading patent in equipment design & development, TOS is the proven leader in field running services for any and all applications.

BENEFITS

SAFETY – The most stringent, yet rewarding, safety policies in the industry have resulted in one of the lowest WCB rates available, 3700 days worked without a lost-time incident, and over 14 million kilometers driven accident free.

COST SAVINGS – Increased connection longevity and productivity through the use of Proprietary Thread Compounds and precise connection assembly techniques.

EFFICIENT – All employees are trained in connection assembly, conventional & integral power tong use, and computer torque monitoring analysis to ensure superior service on every location.

SERVICES & PRODUCTS

Available in Calgary, Edmonton, and Grande Prairie at TOS office locations.
