OVERVIEW

The TOS Thread Protector Removal Tool is a Patent Pending system that has been rigorously tested and applied in a variety of field settings for the removal of all Pin and Box thread protectors.

This innovative system is the first of its kind and is set to revolutionize the industry with its capabilities.

BENEFITS

SAFETY - Reduces/eliminates injury associated with the repetitive nature of manually removing thread protectors. Compressor system incorporates vapour proof electrical fittings and is enclosed within a steel frame.

COST SAVINGS - Manual removal of Box & Pin protectors on 300 joints equals 5 hours of rig time.

EFFICIENT - 22 thread protectors removed per minute. Compressor system supplies 7.6 cfm of continuous air supply coupled with a 115 Volt/60 Hz/15 Amp electrical supply.

CONVENIENT - Portable & lightweight system with a user friendly operating interface.

SALES & RENTALS

Available in Calgary, Edmonton, and Grande Prairie at TOS office locations.
